

Technical Bulletin

Date: July 5, 2018

Product: Sacksafoam Heli-Case

Subject: Change to fittings

Background

For production reasons SEI is changing the fittings on the dispense assembly of the Sacksafoam Heli-Case. The new fittings replace multiple components in the old assembly. The change also updates the top plate.

Recommendations

Customers with the older fittings do not need to upgrade to the new fittings.

This change is not backwards compatible. Customers that require new fittings are recommended to send in their Sacksafoam Heli-Case for the upgrade or to purchase the complete dispense assembly (012370).
