

Aerial Fire Ignition Dragon Eggs Ignition Spheres

SEI
INDUSTRIES

The Dragon Eggs ignition consists of a sustained flame with 'flare-like properties' burning for approximately two minutes.

Dragon® Eggs offer reliability, improved free-fall characteristics and high visibility. They're field-proven as the most trustworthy ignition sphere on the market. Whether used for prescribed burning in the off-season or back burning at the height of fire season, Dragon Eggs are the ultimate choice in aerial ignition.

FEATURES

- Ignition reliability (100%)
- Multi-colored casing to increase visibility (easy to spot)
- Smaller size
- Can be used with the revolutionary next generation RED Dragon or GREEN Dragon ground launcher and Pyroshot Handlauncher

SHIPPING BOX CERTIFICATION

- ISTA procedure 1A
- UN 4G combination packaging
