

# Emergency Relief Tank

Combining portability, economy and durability, the ER (Emergency Relief) Tank is intended for temporary storage of water during emergency situations and is ideal for use in remote areas. The ER Tank is constructed of high strength industrial fabric that will withstand climate conditions from -40 degrees to +70 degrees Celsius.

## Features

- Self-supporting: no frame or parts to assemble
- Quick set-up and knock-down time
- Constructed of high-strength quality material
- Potable water version NSF standard 61 models available
- Models also available for grey water usage
- Portable, lightweight, easy to deploy
- Economical, will not rust
- Offers water storage capacity many times larger than its transportable size

## Standard Fittings

- One each fill/drain ports with fittings and flange
- Includes 3" (76 mm) NPSH flange with plug
- Includes 4" (102 mm) vent cap with brass breather

## Tank Options

- Groundsheet
- Carry bag
- Repair pocket (for potable water or grey water)
- Repair kit (boxed)
- Fitting kit

## Specifications

| Capacities and dimensions (L x W x H) |       |                   |                 |
|---------------------------------------|-------|-------------------|-----------------|
| USG                                   | L     | IN                | CM              |
| 600                                   | 2000  | 100' x 76' x 19"  | 254 x 193 x 48  |
| 1400                                  | 5000  | 156' x 95' x 24"  | 396 x 241 x 61  |
| 2700                                  | 10000 | 146' x 142' x 36" | 370 x 360 x 91  |
| 5300                                  | 20000 | 200' x 169' x 43" | 508 x 429 x 109 |
| 14000                                 | 50000 | 298' x 222' x 56" | 756 x 563 x 142 |
